

**Haryana Renewable Energy Development Agency (HAREDA)**  
**Institutional Plot No. 1, Akshay Urja Bhawan,**  
**Sector-17, Panchkula**

**RfP for PADDY STRAW BASED POWER PROJECTS**

**CORRIGENDUM**

HAREDA had floated RfPs through e-procurement haryana portal on 03.08.2017 for inviting proposals for setting up of paddy straw based power projects in 6 paddy dominant districts of the State namely Ambala, Kurukshetra, Karnal, Kaithal, Jind and Fatehabad. The last date of submission of RfP is 29.09.2017.

It has been observed that for paddy straw based biomass power project with the CERC has fixed two types of tariffs for the year 2017-18 namely:

- a. For biomass power projects (rice straw and juliflora plantation based projects) with air cooled condenser and **travelling grate** boiler. Tariff Rs. 8.10 per unit.
- b. For biomass power projects (rice straw and juliflora plantation based projects) with air cooled condenser and **ABFC boiler**. Tariff Rs. 8.0 per unit.

**In this regard, it is clarified that the discount offered by the bidders will be applicable on the technology being used for setting up of the project and HAREDA will shortlist the bidder offering maximum discount on CERC/HERC tariff for the year 2017-18 (as applicable) irrespective of the technology used that is on the lowest applicable tariff of Rs.8.00 per unit.**

Further, the clause no. 2.3 (vi) may be read as under:

“In case the developer is unable to produce the land ownership documents, the Letter of Intent (LoI), MoU/IA, shall be cancelled and performance bank guarantees shall be forfeited.”

Other terms & conditions of the RfP shall remain the same.

Director General  
HAREDA
